

# FRICION REDUCING CONCENTRATE

# UNIGLIDE

## PERFORMANCE FROM TECHNOLOGY

| Application                               | % of sump capacity |
|---|--------------------|
| Crankcase oil for Petrol / Diesel engines | 10%                |
| Manual Transmission                       | 10%                |
| Automatic Transmission                    | 5%                 |
| Wet clutch assemblies                     | 5%                 |
| Differentials                             | 12.5%              |
| Heavy Duty reduction gearboxes            | 12.5%              |
| Hydraulic pumps and rams                  | 3.5%               |
| Compressors                               | 10%                |

Re-treat engine with 5% every subsequent change

### BENEFITS

- Reduce friction, wear, drag and operating temperatures.
- Reduces oil consumption, oxidation and corrosion.
- Provides for maximum compression and power.
- Does not "build up" on metal surfaces.
- Increases engine and equipment life.
- Provides start-up lubrication.
- Provides cold start protection.
- Reduces fuel consumption.

### IMPORTANT

- Uniglide **CANNOT** repair damaged or worn surfaces.
- **NOT** to be used in engines that have not been run in, i.e. suggest 5000km or 250hrs.
- **NOT** suitable for clutch-type LSD.

**Keep out of reach of children**
