

FRICION REDUCING CONCENTRATE

UNIGLIDE

PERFORMANCE FROM TECHNOLOGY

Application	% of sump capacity
Crankcase oil for petrol / diesel engines	10%
Heavy duty reduction gearboxes	12.5%
Hydraulic pumps and rams	3.5%
Compressors	10%
Generators	10%

**HEAVY PLANT
& EQUIPMENT**

FRICION REDUCING CONCENTRATE

REDUCE DOWNTIME AND
EXTEND EQUIPMENT LIFE

BENEFITS

- Reduce friction, wear, drag and operating temperatures.
- Reduces oil consumption, oxidation and corrosion.
- Provides for maximum compression and power.
- Does not "build up" on metal surfaces.
- Increases engine and equipment life.
- Provides start-up lubrication.
- Reduces fuel consumption.
- Provides cold start protection.

IMPORTANT

- Uniglide **CANNOT** repair damaged or worn surfaces.
- **NOT** to be used in engines that have not been run in, i.e. suggest 5000km or 250hrs.
- **NOT** suitable for clutch-type LSD.

**Keep out of
reach of children**

**FRC is the ultimate in lubrication technology,
reducing friction, wear and operating
temperature, thereby extending the future
of your lubricated assets.**
